

NEW HORIZONS PA SYSTEM

New Horizons is happy to offer an updated and streamlined the PA system, which includes some new equipment.

All the equipment you need is visible. No need to look inside the cabinet below the equipment for hidden gems! ☺

The PA System:

- The PA amplifier is located above the Blu Ray player on the top shelf
- It is used for SPEAKING ONLY
- **PLEASE DO NOT PLUG IN MUSICAL INSTRUMENTS – you will blow the speakers!!!!** ☹
- Each of the 2 Mics are set a #5 and you can adjust the master volume to a maximum of 12 on the dial
- Turn it on and go
- Speakers are now up in the rafters and off the floor for improved broadcasting to the back of the room
- Always turn the Master volume off when you turn the PA amplifier off

If you have questions or need help call Don Geppert 250-335-2636

NEW HORIZONS AV SYSTEM

New Horizons is happy to offer an updated and streamlined the AV system, which includes some new equipment.

All the equipment you need is visible. No need to look inside the cabinet below the equipment for hidden gems! 😊

The AV System:

1. Computer hook-up

- Plug the HDMI cable into your computer – it is provided on the top of the cabinet and labeled HDMI1 VIDEO
- Set the TV input to PIONEER – no other TV input is required (Everything for the TV must go through the Pioneer Amp first)
- Set the Pioneer input at VIDEO1 for sound

2. How to play any disc (CD, DVD, BluRay)

- Insert disk in the BluRay player on top of the Pioneer amplifier
- On the Amplifier select the BD input using the large knob on the left, then adjust volume (right hand side) to taste.
- Sound comes from the speakers on the shelf under the TV and sub woofer on the floor
- If you need to see the track listings etc., you need to turn on the TV (not displayed on the BluRay player itself)
- Be patient and give the system a moment to start working! 😊

3. BluTooth JBL BOOMBOX (NEW!)

- It is on top of the Cabinet and locked in place
- Press the power switch (left button inside the white oval)
- Set your Smart Phone, Tablet, or Computer's BluTooth speaker settings to The JBL BOOMBOX 2
- Sound is magically sent from your device to the boombox! 😊
- Control the volume from your device
- The boombox is separate from the AV system

4. FM Radio

- The Pioneer Amplifier has a "Tuner" for FM radio
- Set the input knob on the amplifier for "Tuner" and you are good to go
